Accenture: Digital Skills – User Experience
Digital skills course focusing on user experience

PROJECTS

Smart Job Portal System

- Developed a full-stack job portal application using React.js for the frontend and Django for the backend.
- Implemented user authentication, job posting, job search, and application tracking features with MySQL database integration.
- Deployed the application on AWS and optimized database queries for efficient performance and scalability.

Student Management System

- Developed a web-based Student Management System using React.js and Django.
- Implemented student registration, profile management, attendance tracking, and academic record management with MySQL database integration.
- Designed responsive user interfaces and optimized database operations for efficient data handling.
